2. MIDWIFERY AND CHILD HEALTH NURSING –LAB

Institution has midwifery and child Health Nursing Laboratory as per the Indian nursing council regulatory body. This laboratory is designed for students to appreciate the concepts and principles of midwifery and obstetrical nursing. It helps students to acquire knowledge and skills in rendering nursing service to normal and high-risk pregnant women to antenatal and postnatal periods in hospital and community settings. And also, modern approach to child care, identification, prevention and nursing management of common health problems of newborn and children. It also helps to develop skills in managing normal and high-risk neonates and participate in family welfare programmes. This laboratory provides firsthand experience in assessment of antenatal case, intranatal case, post-natal case, neonatal assessment and demonstration of nursing care and handling problems accordingly. Institution has total 27 different highly effective models and 5 mannequins of mother and baby. Students are taught different procedures in MCH laboratory before going to clinical areas. This lab provides solid foundation for pediatric and midwifery nursing i.e., firsthand experience to handling neonates and children with the help of simulated model (manikins) and also performing related nursing procedures, before going to actual clinical setting.
